

The Villas at Poco Diablo is asking you for your help!

Here are some real easy tips to help conserve energy!

- ♻️ Recycle! Our resort has recycle bins located by the large Cottonwood tree, so please ask for a recycle bag at the Front Desk so we all can pitch in.
- 💡 Turn off all of your lights when leaving the room.
- 🌡️ Set your thermostat at 79 degrees or higher. For every degree warmer, you'll save 2 to 3 percent of the energy required to cool the unit in the summer.
- 🌀 Use the ceiling fan instead of the air conditioning, or even open the patio door to let in fresh air. If you must use the air conditioning please make sure all doors and windows are closed.
- 🧣 In the winter wrap up with a blanket or wear a sweater rather than turning up the heater.
- 🧻 Reuse your towels during your stay to help reduce the usage of water, electricity and the detergents needed to clean the towels.

We at the Villas at Poco Diablo feel that protecting our natural resources is a Team Effort. It is our sincerest effort to serve our guests, yet we also have taken steps to conserve our natural resources; together we can make a difference. We have begun by replacing all of our standard water heaters with new Rheem® “On-Demand” Tankless Water Heaters which greatly reduce our natural gas usage. If you are interested in information about the benefits of tankless water heaters please visit www.rheemtankless.com. We also have installed new patio doors with Low-E glass that acts as a filter for the sun’s heat during the summer and a insulator during the winter cold. We are also looking for additional ways to conserve with the advent of improved lighting technology. Our next project is to replace incandescent bulbs with Energy Star rated compact fluorescent bulbs as they burn out. If you have any ideas on energy conservation please let us know.

The entire staff of the Villas at Poco Diablo thank you for helping us make a difference. Together we can help ensure that our future generations will be able to enjoy the resources that our planet provides for us.
